

JobFair

Mozaik Event Center
21 - 22 May 2025

About

Design your FUTURE - at the 18th Job Fair!

The future isn't something we wait for - it's something we **create**. Job Fair wants to explore the bold ideas, technologies, and careers that will shape the world of tomorrow. Connect with students and companies at the forefront of emerging industries, present future-ready skills, and envision careers that don't just adapt to change but drive it.

At Job Fair 2025, it's not just about finding a career - it's about designing your future.

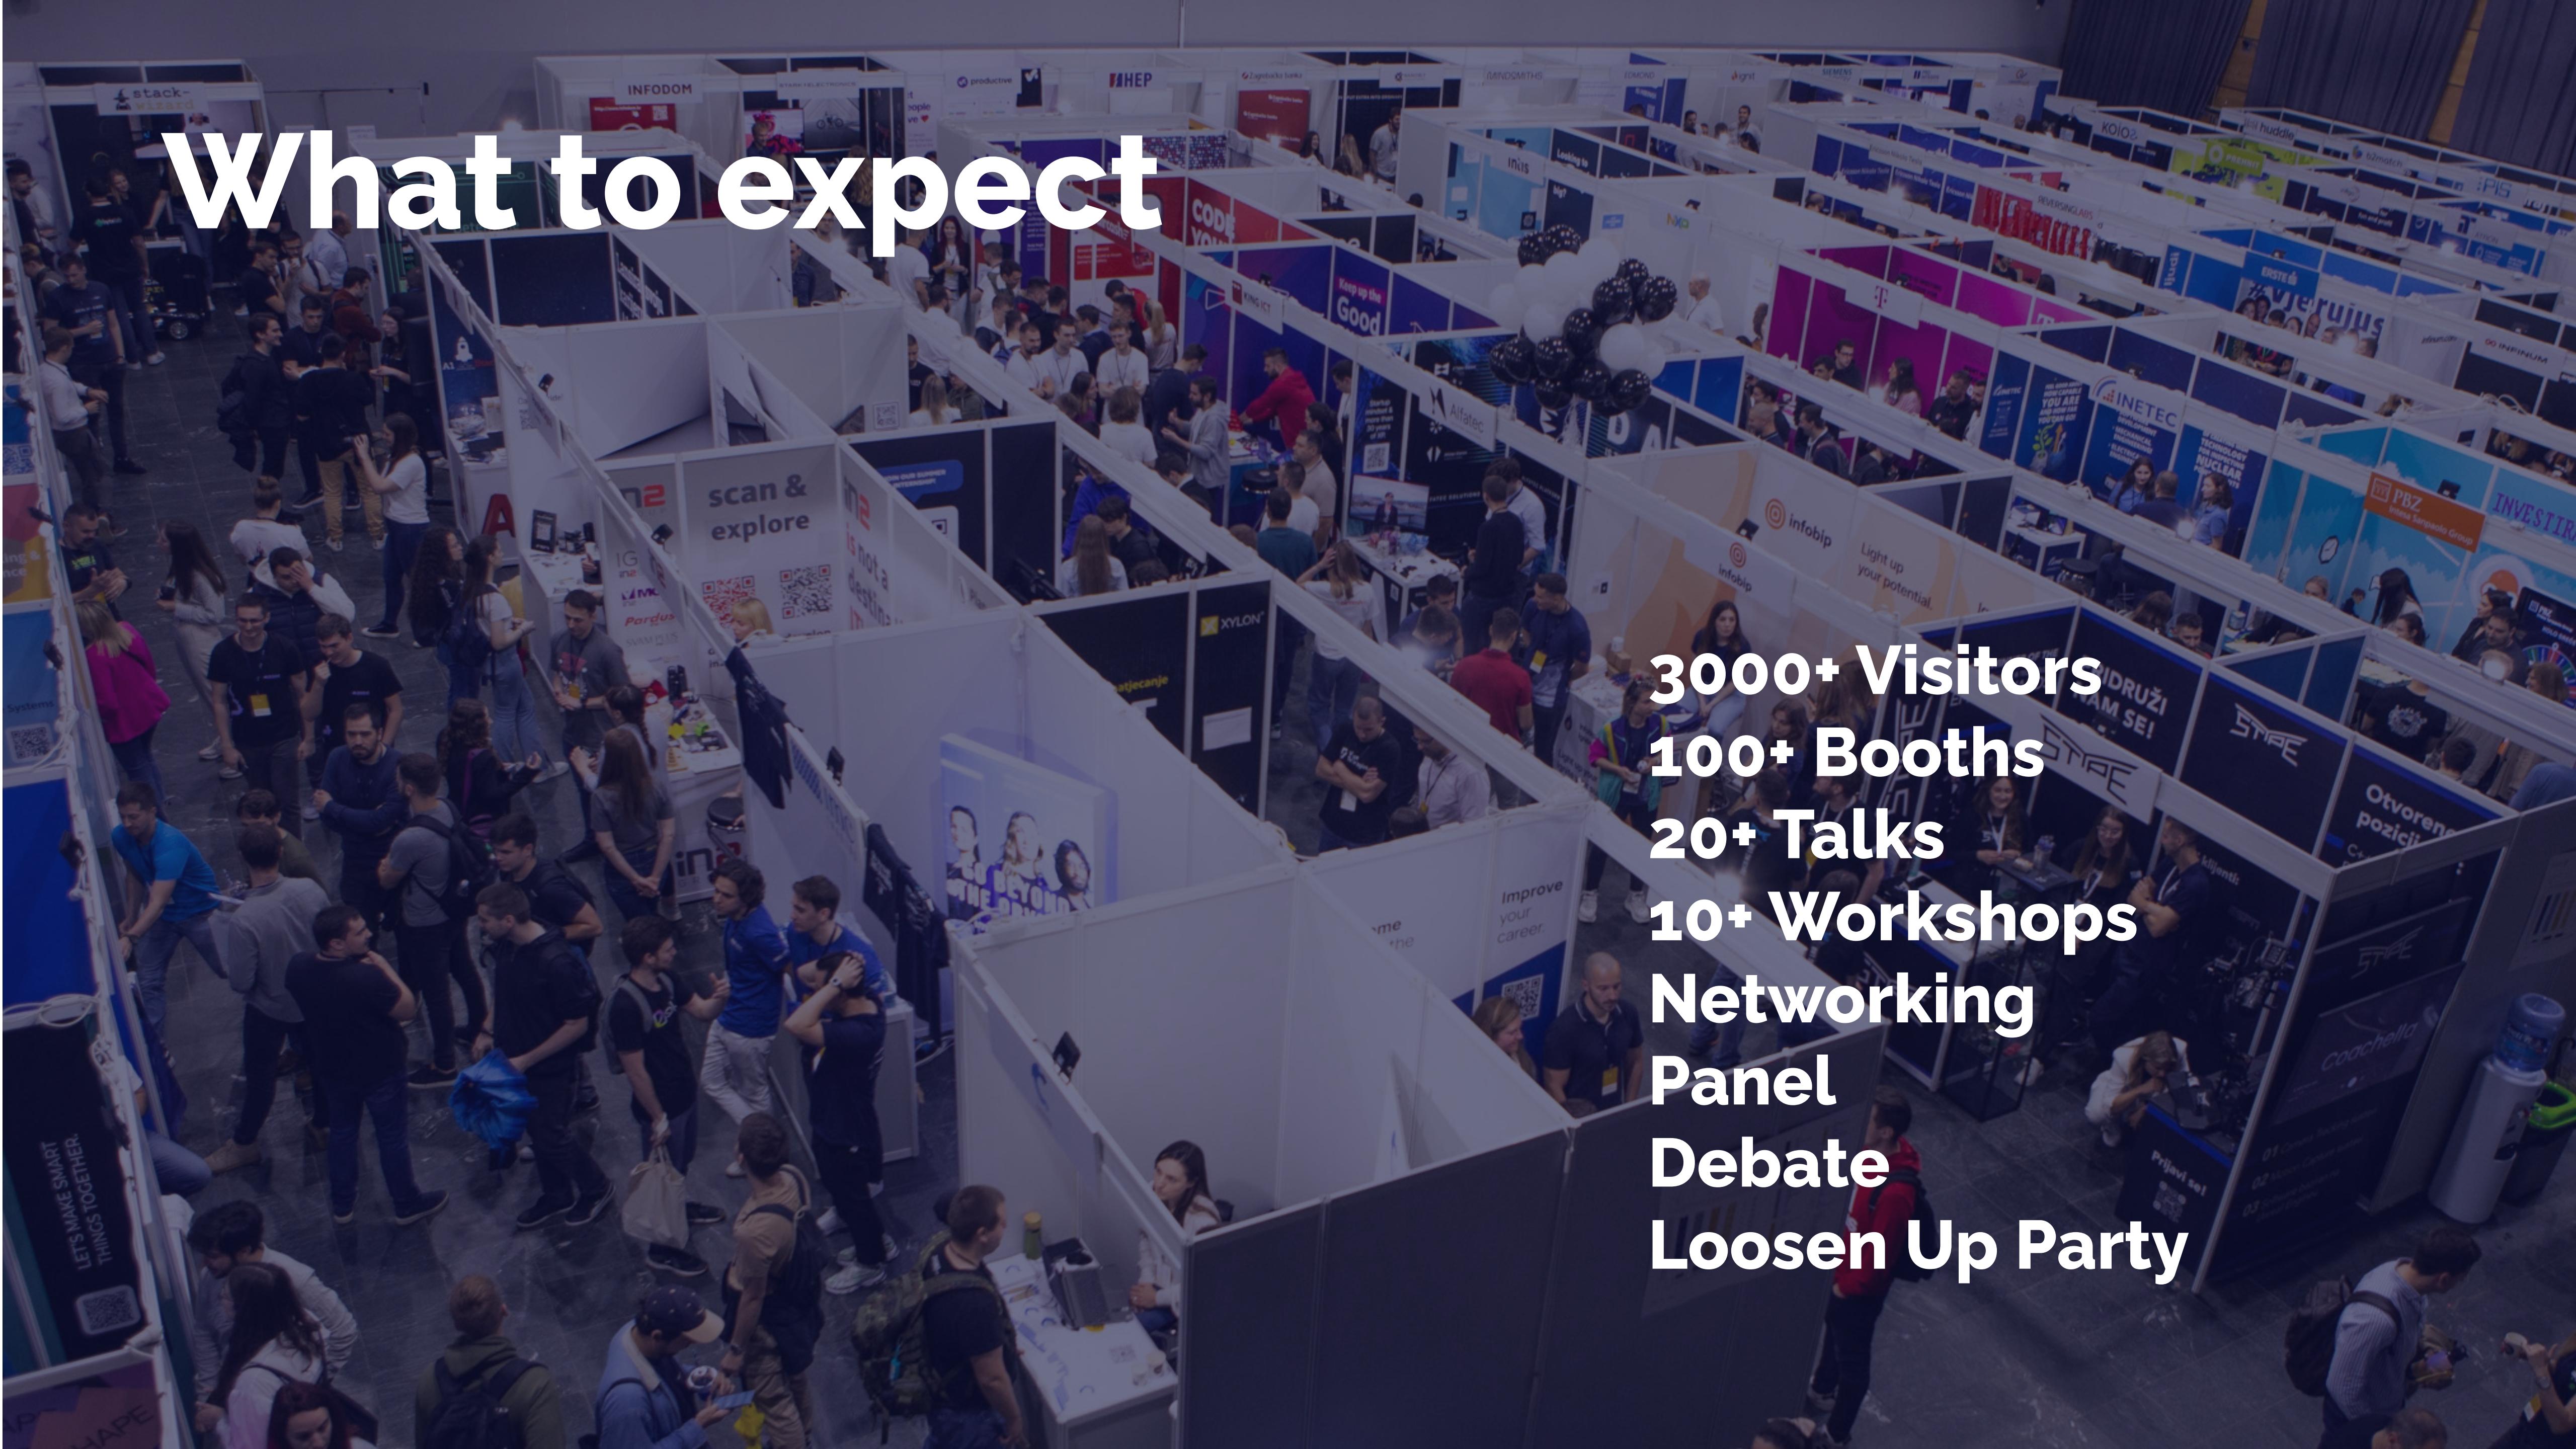

It's an opportunity to inspire and be inspired. During two days of unparalleled networking and collaboration with industry experts and potential future talents, present your company in more than one way!

Welcoming booths, meaningful talks, valuable workshops, inspiring panel discussions, and the highly anticipated Loosen Up party with the King of Cocktails are going to make these two days an **unforgettable time**.

**Join us at Job Fair -
the biggest regional
career festival!**

What to expect

An aerial photograph of a large exhibition hall filled with numerous white trade show booths. The booths are densely packed, creating a grid-like pattern across the floor. Many people are visible walking between the booths or standing at tables, indicating a busy event. The lighting is bright, typical of indoor exhibition spaces.

3000+ Visitors
100+ Booths
20+ Talks
10+ Workshops

Debate
Loosen Up Party

Participant reviews

Company Perspective

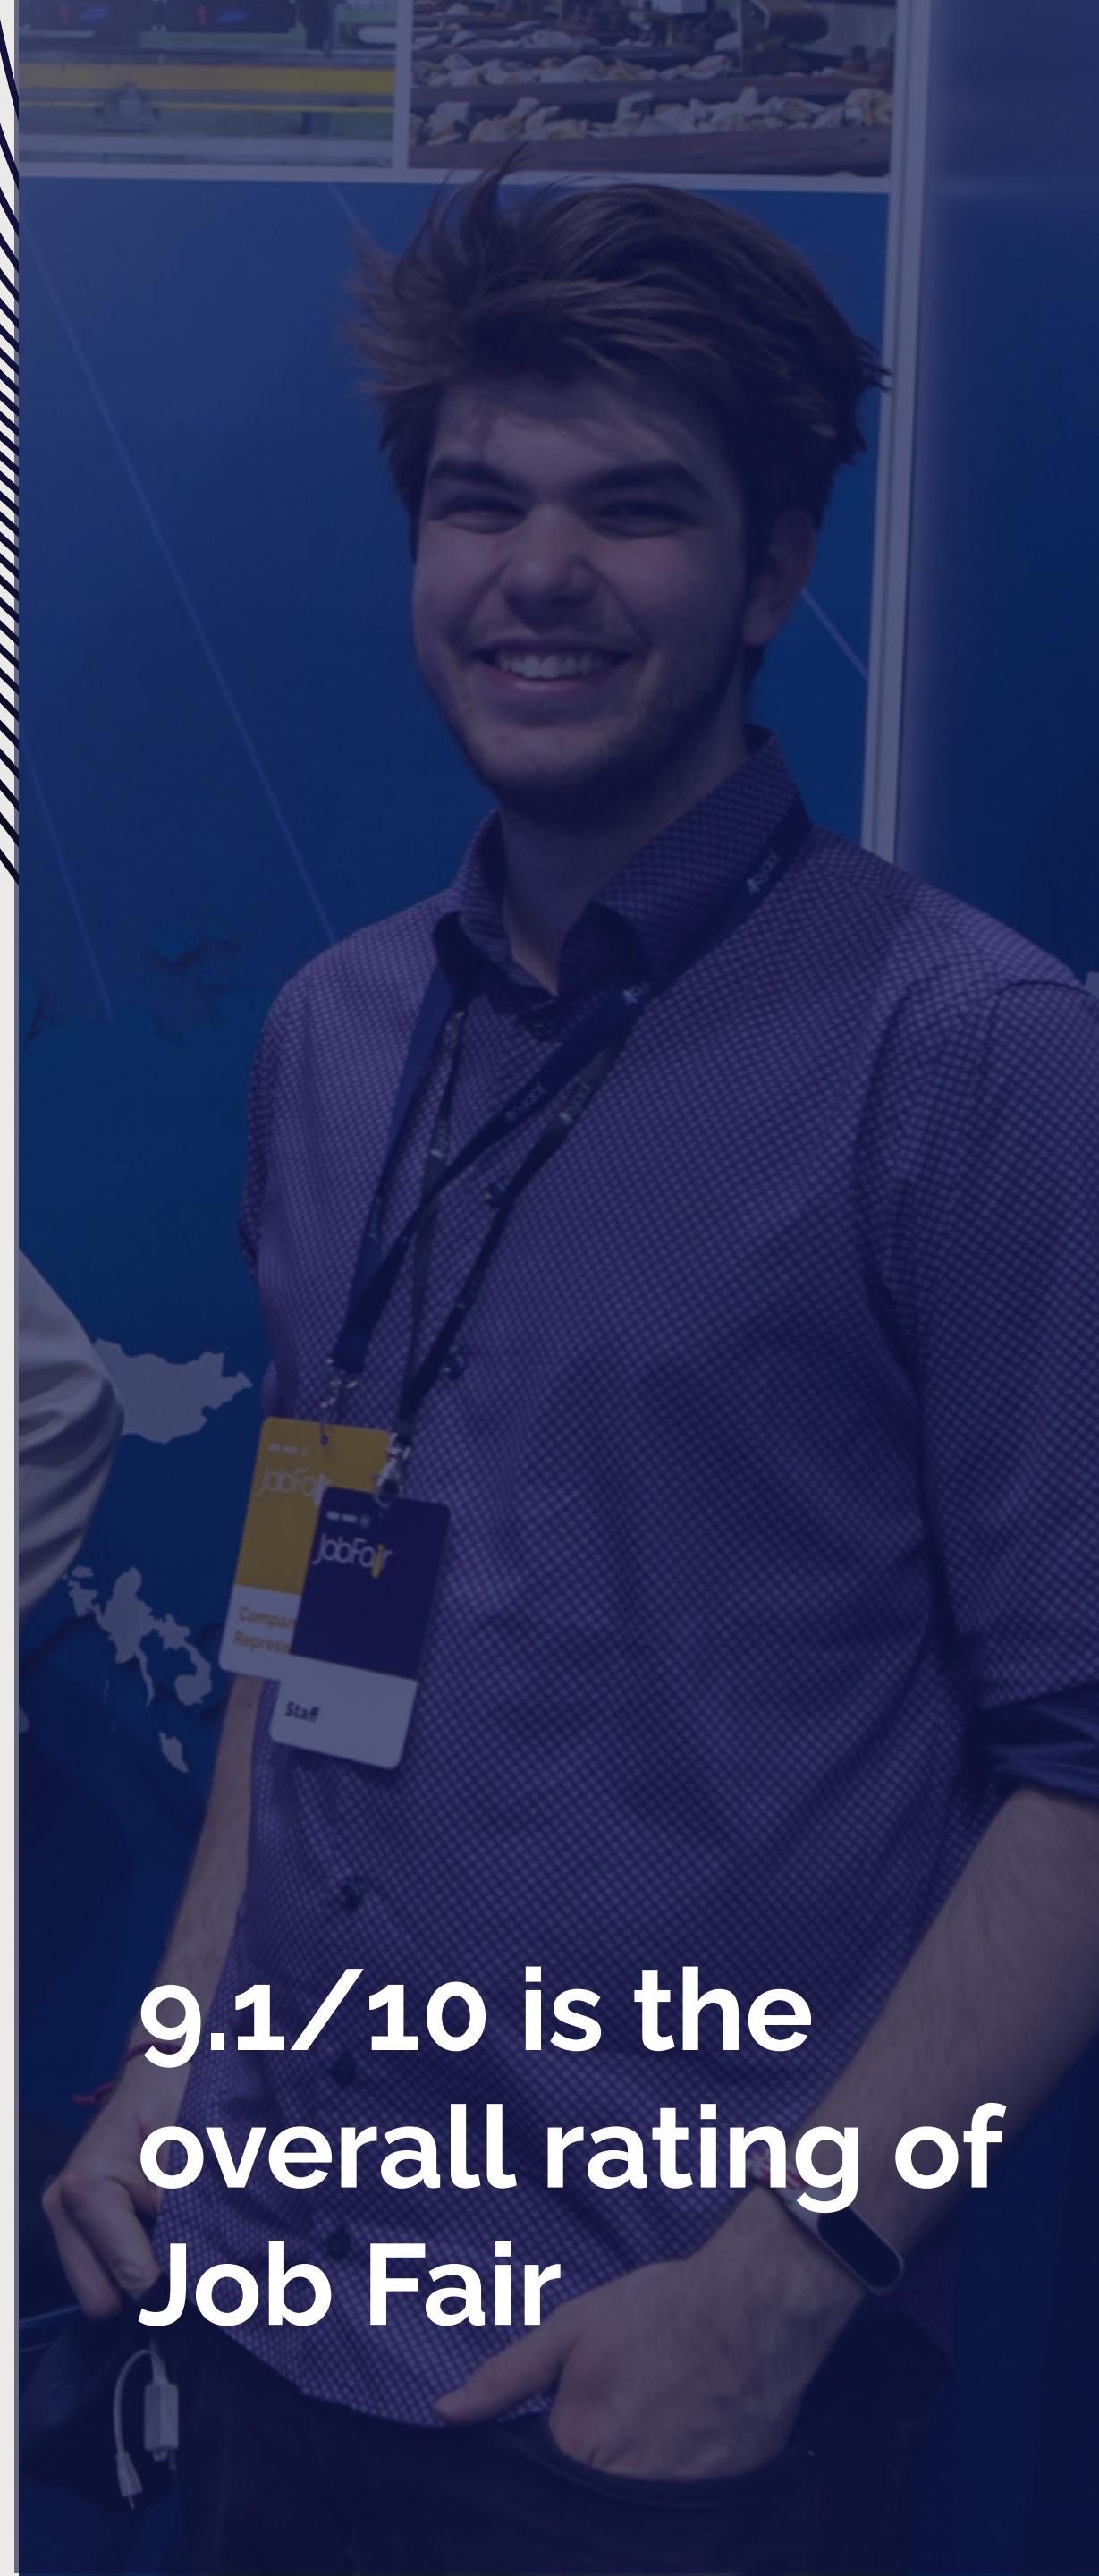

"Everything deserves a 10!" - **Yazaki**

"The Job Fair is always a great opportunity to meet students and present our company and the summer internships we organize for students. We have been participating since 2018 and we can confirm that the organization gets better every year!" - **Netgen**

Student Perspective

"It's great to see colleagues who finished FER, but are now on the other side of booths and hear their journey!"
- **Ivan, 2nd-year undergraduate**

"Job Fair for me is the best way to decide where I want to do my next summer internship program."
- **Karla, 1st-year graduate**

9.1/10 is the overall rating of Job Fair

All the participants' logos will be featured on the Job Fair webpage. All of the participants will receive lunch and refreshments during the event.

VAT is not included in the price. The number of talks, workshops, booths, and beverages at the party is limited.

The form of cooperation and the terms of participation are subject to the agreement.

GENERAL PARTNER

6.050,00 €

- showcase your brand fully at Job Fair with the superior booth, talk, and King of Cocktails in this ultimate 'everything you need' package

Interested in being our general partner company? Contact us directly at jobfair@fer.hr

SUPERIOR BOOTH INCLUDES:

- booth dimensions 4 x 1.5 m
- up to 10 company representatives
- the biggest booth at Job Fair places you in the center of everyone's attention
- company branding during the talk breaks (logo on the screen)
- company branding on stream (logo on the screen)

TALK

705,00 €

- engage the audience with a 20-minute stage presence, sharing your passion
- your talk will be live-streamed on our Job Fair YouTube page, providing a parallel audience
 - both offline and online

WORKSHOP

903,00 €

- forge a direct connection with eager learners during a 90-minute workshop, guiding them through the nuances of your favourite topic

KING OF COCKTAILS

513,00 €

- brand your company with 100 custom-named 0.2L drinks at the Loosen Up Party and make your company the most wanted drink on the menu

King of Cocktails can only be selected in addition to talk, workshop or booth, giving you a priority for participating in fun activities at the Loosen Up Party

Talk categories

Companies that pick the Participation Package for Talk can apply to host a topic of their choice in one of three categories for this years festival:

Butterfly Careers

Every successful career is built on key decisions made in the past. Explore the impact of key choices, the ability to adapt in a changing job market, and the moments that turned out to be game-changers, defining successful careers. Present stories of individuals who made bold career pivots, embraced emerging trends, or developed critical skills that set them apart. Share experiences and insights on building a career that is resilient, forward-thinking, and full of opportunities.

- What skills, industries, or trends did you bet on that led to long-term success?
- Which strategic decisions can young professionals make today that will benefit them in the future?
- How do past job market predictions compare to today's reality?

Unexplored Solutions

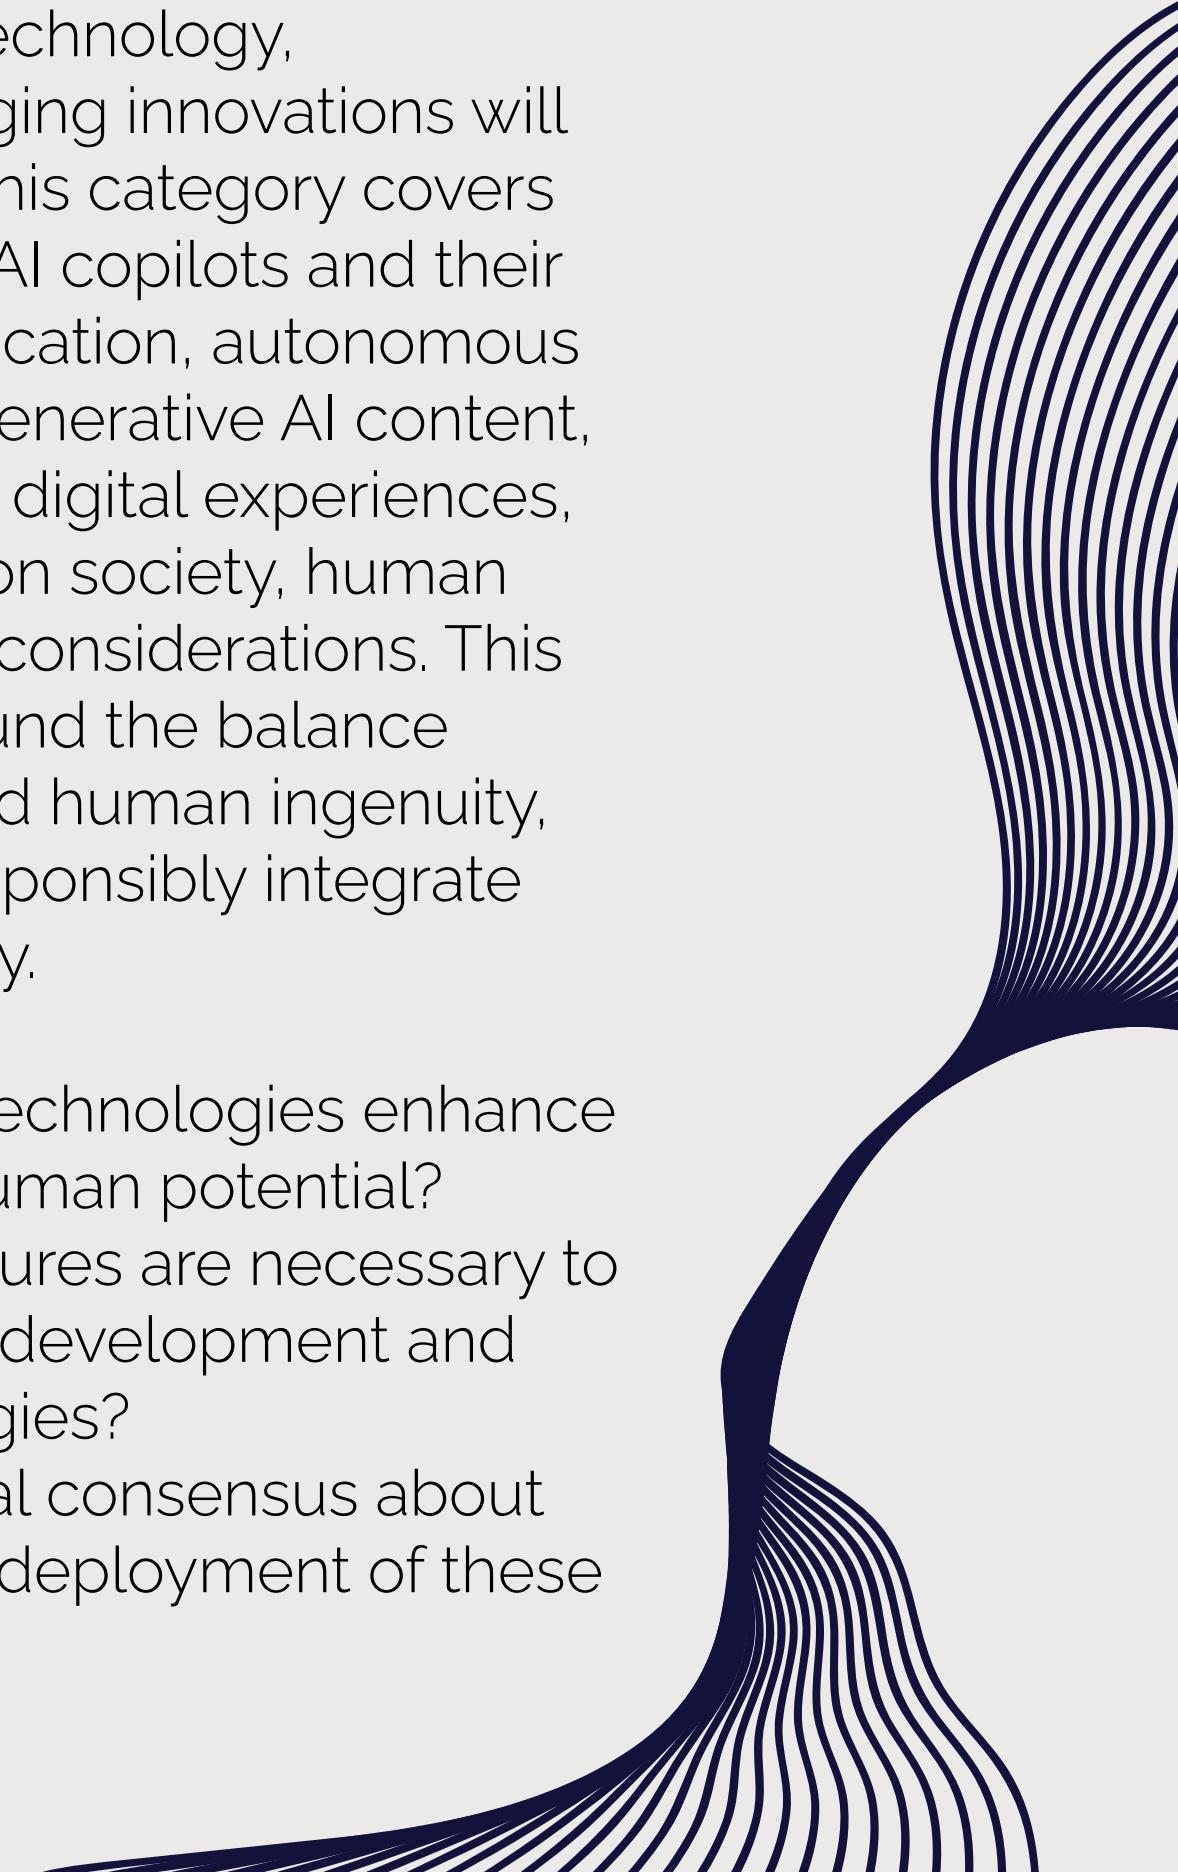

The best way to predict the future is to create it. Many industries and social systems still rely on outdated processes, leading to wasted time, resources, and money. Can these issues be resolved through the application of emerging innovations such as advanced automation, artificial intelligence, biotechnology, or similar technologies? The goal of this topic is to present a hypothetical solution on a pressing issue that troubles our society and encourages participants to think critically, explore, and, in future, design innovative technological solutions that could address today's challenges and improve various aspects of society, industry, and everyday life.

- What current inefficiencies could be solved with futuristic technology?
- In which way can AI, automation, or new innovations reshape industries?
- How can technology transform society and everyday life challenges?

Human Tech

Investigate the evolving relationship between humans and technology, emphasizing how emerging innovations will redefine everyday life. This category covers advancements such as AI copilots and their use in business and education, autonomous vehicles and systems, generative AI content, and hyper-personalized digital experiences, examining their impact on society, human connection, and ethical considerations. This discussion revolves around the balance between automation and human ingenuity, and how society can responsibly integrate cutting-edge technology.

- How to ensure these technologies enhance rather than diminish human potential?
- What regulatory measures are necessary to guide the responsible development and use of these technologies?
- Is there a lack of ethical consensus about the development and deployment of these technologies?

UNWIND - 3 for 2 extra

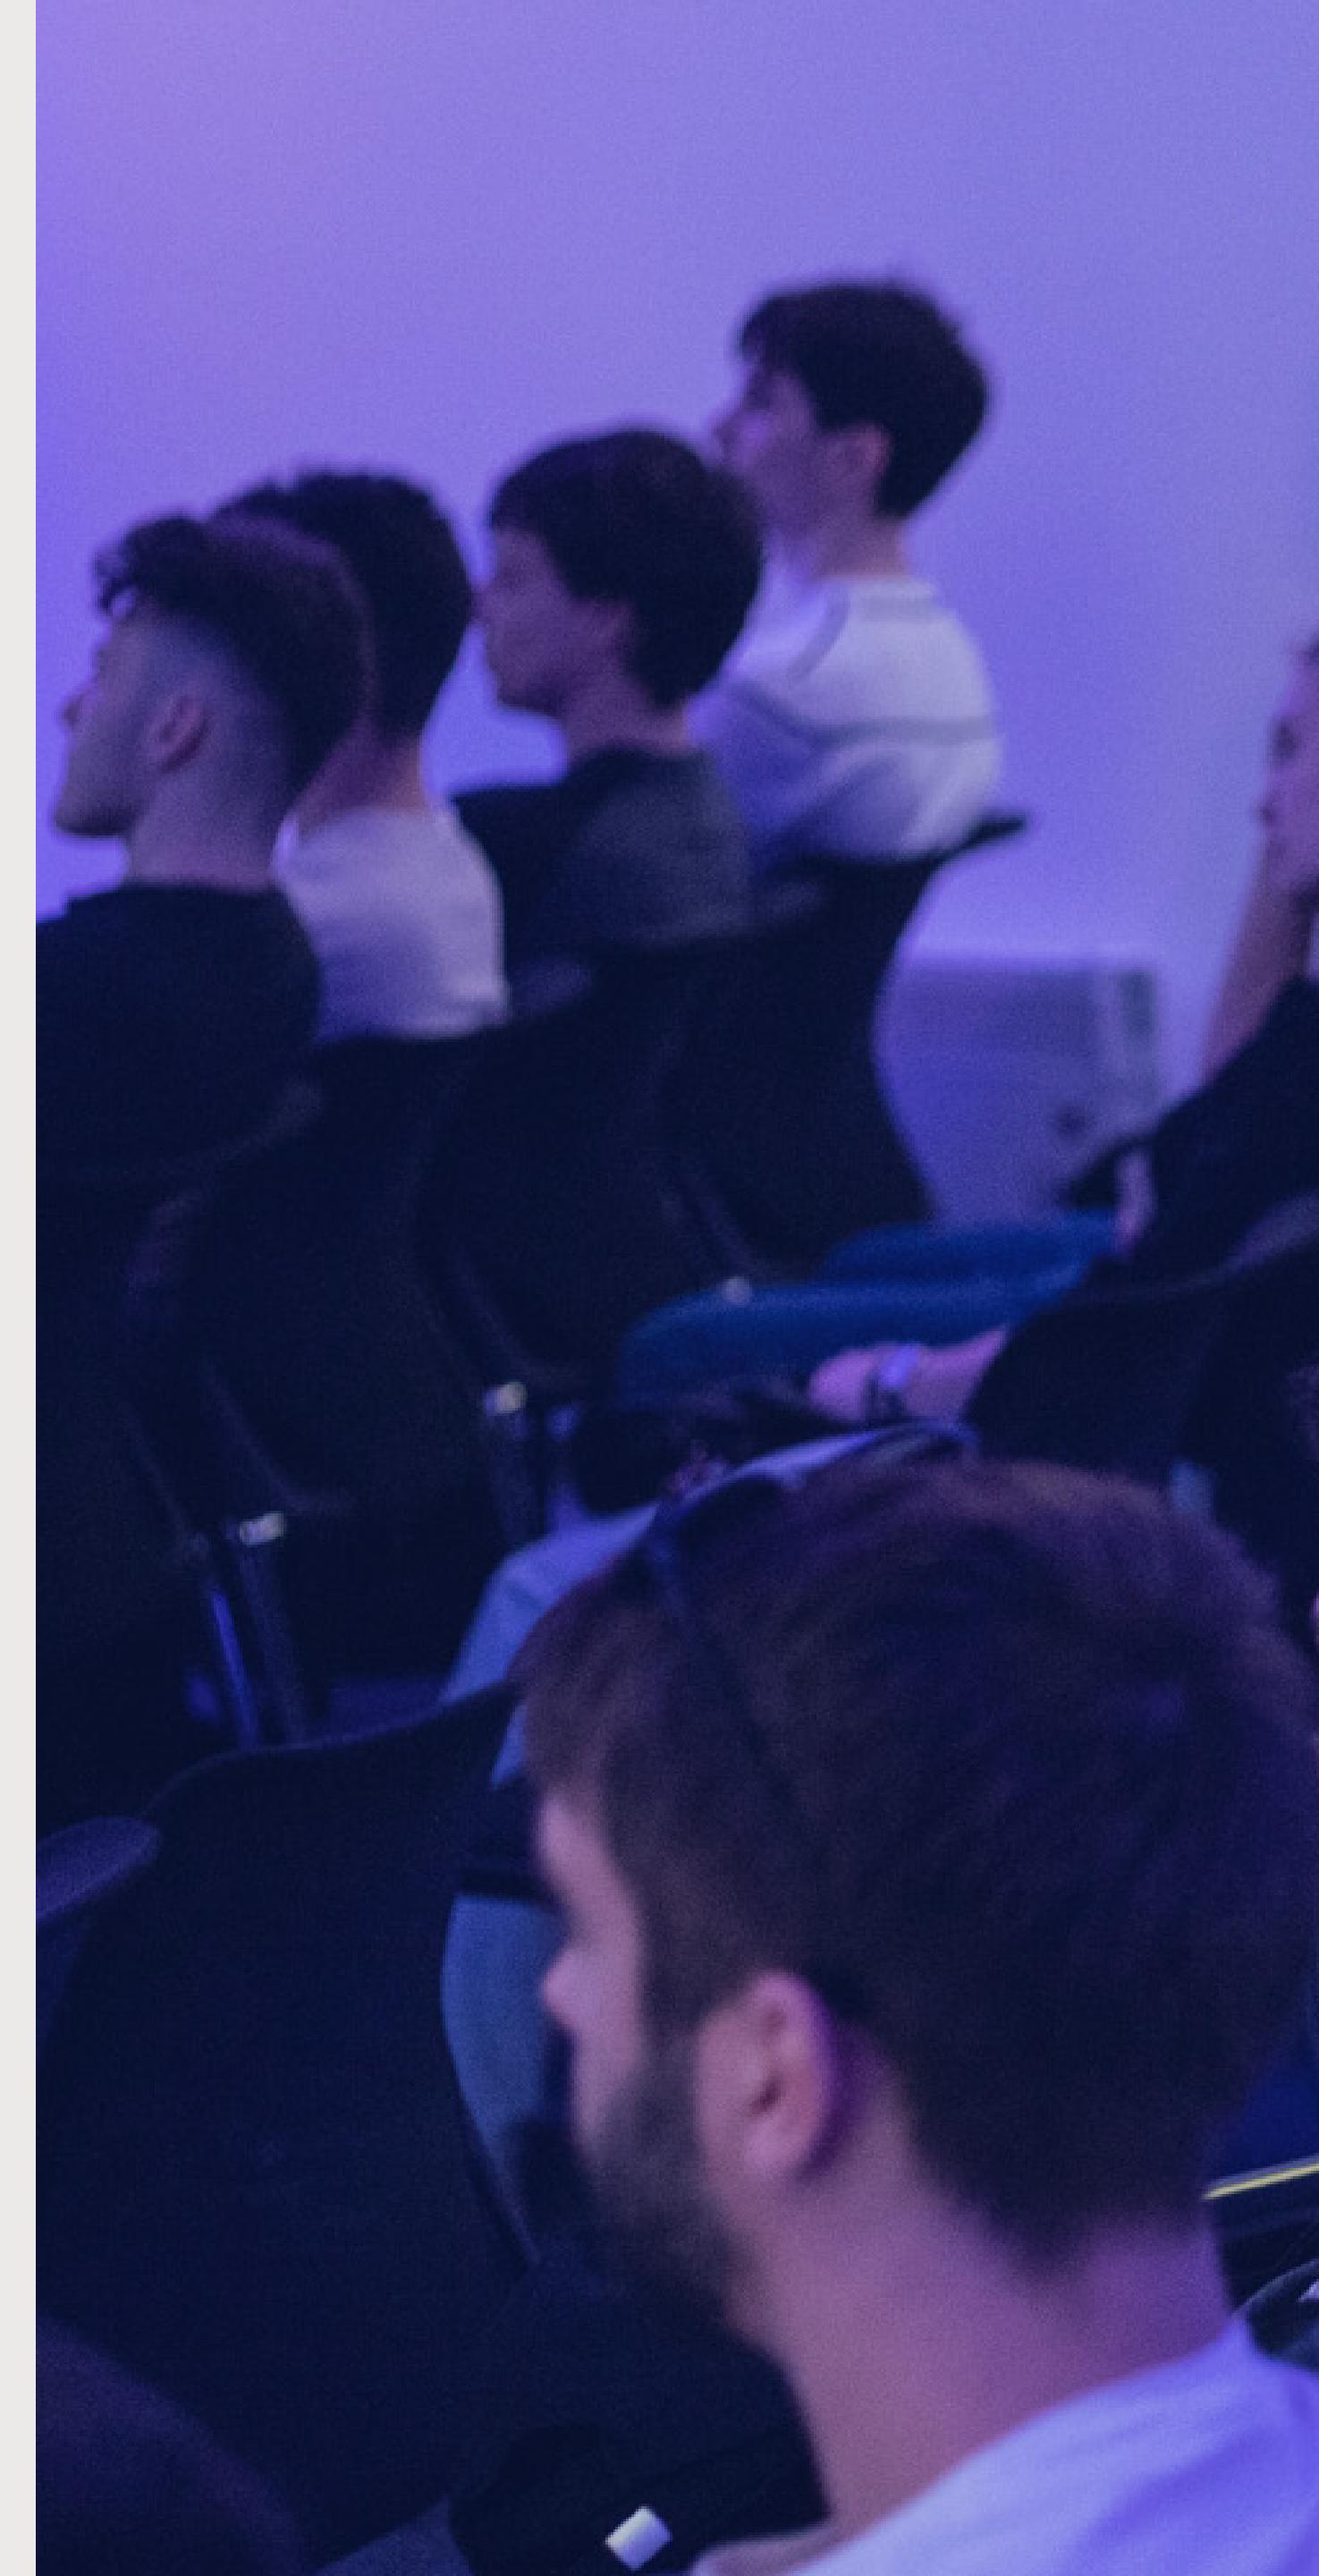

Companies that pick two participation packages can apply for the first round table - exclusively for company representatives at Job Fair.

The topic of the Round Table will be -

Future with Purpose: Innovating with Impact in a Tech-Driven World

As we design the future, purpose remains our guiding star. This roundtable will explore how tech and IT companies can integrate long-term vision with meaningful impact, ensuring innovation doesn't just drive growth but also serves a greater good. From ethical AI to sustainable technologies, discover how businesses can align future-forward strategies with social needs, empowering the next generation of talent to build a future with purpose.

Join business, marketing, and leadership experts to discuss how purpose-driven innovation can shape a more resilient, responsible, and visionary tomorrow. Connect and gather experience valuable for your next employer branding strategy.

Panel

Participate in a 45-minute long panel discussion with other participants and discuss a hot industry topic in which you can show your company's expertise in the field.

The companies that will participate in the panel discussions will be confirmed later. By choosing a panel discussion in the application form, you express interest in participating. The organizer will subsequently invite interested companies to participate in the panel discussion concerning the topics determined by the organizer. In case a company wants to be selected for the panel, the company must have previously selected a booth, talk or workshop. For the selected companies, participation in the panel discussion is free of charge.

This year's topic is...The Future of Combating Digital Deception!

As AI-generated misinformation becomes increasingly sophisticated, the necessity for strong verification mechanisms in the future grows. Every day you can find more and more AI-generated content online: from news, Instagram posts, various designs, and even scientific articles. It is becoming almost impossible to determine its authenticity.

This panel will explore the rise of an economy centered on digital authenticity, using advanced technology to prove the authenticity and origin of digital content.

In this discussion we will examine the challenges of combating deep fakes, the role of technology in ensuring information integrity, and how constant verification affects and will affect society in the future.
